

Deliver faster. Record better.
Build accountability.

Contractors that use FlowLedger deliver projects faster; building stronger records and shared accountability along the way.

- ✓ FlowLedger keeps teams focused on the right tasks at the right time, accelerating delivery with no extra cost.
- ✓ It captures progress and decisions in real time, eliminating update chasing and building a clear audit trail.
- ✓ It hands control to the site team, turning priorities into commitments and boosting ownership across the board.

Intelligent to-do lists

Thousands of activities are filtered into the handful of tasks that actually require your focus

Benefits

FAQ

Q: How does it work?

A: It uses data from the contract programme to create a to-do list which the team tick-off as they go. At month end this progress information is fed back into the contract programme for the next update.

Q: How does it accelerate work completion?

A: FlowLedger limits the workload to only what the team can deliver effectively. This reduces bottlenecks and helps tasks get finished faster. Minimising how much work needs to get done increases the speed at which individual tasks are completed.
